GRAMICID – 125 (CHEMICAL FOR DECHLORINATION OF WATER)

GRAMICID-125 is based on Sodium Meta Bisulphite (SMBS). It is a Solution especially for Dechlorination of water.

SPECIFICATIONS:

Appearance	White to yellowish crystals or powder
pH (1% solution)	4.3(Acidic)
ODOUR	slight sulfur odor

BENEFITS:

- Gramicid-125 neutralizes the effect of chlorine in chlorinated water.
- It helps to remove chlorine from both sodium hypochlorite (bleach) and chloramine treated waters.
- Gramicid-125 is very helpful and important to municipal water authorities in the event that chlorinated water needs to be discharged into the environment.
- It is also used to remove chloramine from drinking water after treatment.
- It is used as a cleaning agent for potable water reverse osmosis membranes in desalination systems.

HANDLING & STORAGE PRECAUTIONS:

- **Gramicid-125** is safe to handle but use of safety goggles and hand gloves are recommended. In case of contact with skin, immediately flush skin with plenty of water.
- Please keep in cool and dark place. It is stable under normal storage conditions.

PACKING: GRAMICID-125 is available in 30Kg and 50Kg HDPE cans
