GRAMICID-401 (ACIDIC)
(LOW PH ANTISCALANT FOR RO SYSTEMS)

GRAMICID-401 is a Broad spectrum antiscalant, especially effective in controlling deposition of inorganic scales. It is efficiently utilized in inhibition of multiple inorganic scale species including calcium sulfate, calcium phosphate, calcium fluoride, barium sulfate, strontium sulfate and silica.

SPECIFICATION:

Appearance	Clear, Colorless to pale yellow aqueous solution
pH (as is)	1.5-3.8
Solubility	Mixable in any proportion
Stability	Excellent
Specific Gravity	1.200-1.300 +/-0.025

BENEFITS:

- Excellent calcium phosphate, calcium carbonate, silicate and iron-oxide dispersancy all in a single product.
- Compatible with all types of membranes.
- Highly Effective with Low dosage and Cost effective
- Non-toxic

CHEMICAL DOSING:

- 2-5ppm of GRAMICID-401 to be dosed in dosing tank

PACKING: GRAMICID-401 is available in 10Kg, 30Kg and 50Kg HDPE carboys.
