## GRAMICID-PHB[L]

### PH Booster

**GRAMICID – PHB [L]** is formulated to increase the PH of water and also replaces soda ash and lime in water treatment.

#### **SPECIFICATION:**

|                          |                        |
|--------------------------|------------------------|
| Appearance               | Clear colorless Liquid |
| pH (as is)               | 11.5-12.5              |
| Specific gravity at 30°C | 1.30 +/- 0.02          |

#### **BENEFITS:**

- Cost effective program for boosting the PH.
- No adverse effects with repeated use of solution.

#### **DOSAGE:**

- GRAMICID-PHB [L] is dosed at 50ppm for increasing the PH of 1 full unit also depending upon the feed water characteristic and alkalinity requirements. (Example: from PH 6.0 to7.0)

**There may be some variation in dosing procedure depending on system condition.**

**PACKING: GRAMICID-PHB [L] is available in 30Kg and 50Kg HDPE carboys.**
